1	2	3	4	5	6	7	8	9	10
		questionnaire for enterprises dealing with generation of thermo-electric energy and heat (EN-4.2)	average calorific values, biogas production, biogas consumption for production of thermo-electric energy and heat, biogas calorific value; gross generation of heat, own consumption, energy dispatched to distributors or other producers of heat, energy received from other producer of heat, transport losses; heat dispatched to the measuring point of consumers by heat holders; heat dispatched to the measuring point of consumers by type of consumer and heat holder; generation of thermo-electric energy, own consumption; electricity received from other organizations; electricity dispatched to end users by type of consumer; installed and realized power of units for gas turbines, boilers and blocks			thermo-electric energy or thermo-electric energy and heat, as well as units of enterprises which principal activity is other than the generation of thermo-electric energy or thermo-electric energy and heat if those units generate thermo-electric energy or thermo-electric energy and heat as activity complementary to principal activity of centerprise; 16/3			
3.	Statistical Office of the Republic of Serbia	Energy balance of generation and consumption of electricity – questionnaire for companies dealing with electricity distribution (EH-4.4)	Total available electricity received from organisation for electricity transmission, other distribution entities, electricity producers; electricity delivered to other distribution entities; losses in distribution; distributed electricity to end users by type of consumer	Annual; previous year	Reporting method – questionnaire EN-4.4	Enterprises with principal activity being distribution of electricity to end users; 16/3	Official Statistics Law	Republic of Serbia	6/10

Ред-ни број	Одговорни произвођач званичне статистике	Назив истраживања и друге активности и ознака упитника	Кратак садржај истраживања и друге активности	Периоди спровођења и референтни период или датум	Методи и извори прикупљања података	Извештајне јединице и рок за давање података	Обавезност давања података	Територијални ниво објављивања података ¹	Рок за прве резултате
1	2	3	4	5	6	7	8	9	10

4.	Statistical Office of the Republic of Serbia	Energy balance of electricity generation and consumption (EN-4.5)	Generation of electricity, own consumption, losses, gross generation, water pumping into accumulation basins of hydro-electric power plants, purchase and delivery of electricity by EPS (Serbian electric utility power company), imports, exports by EMS (Serbian electric network), energy available for final consumption, distribution of final consumption; overview of gross generation of reversible and small hydro-power plants by their capacity, net maximum capacity	Annual; previous year	Reporting method – questionnaire EN-4.5	Companies with principal activity being purchase, sale, imports and exports of electricity; 16/3	Official Statistics Law	Republic of Serbia	6/10
5.	Statistical Office of the Republic of Serbia	Energy balance of generation and consumption of heat – questionnaire for enterprises dealing with heat generation (EN-4.6)	Consumption of fuels for heat energy generation by type of fuel (quantities and average calorific values), stocks; electricity consumed by boiler rooms; gross heat generation, own consumption, energy delivered to distributors or other heat producers, energy received from other heat producers, transport losses; heat delivered to measurement point of consumer by heat holder; heat delivered to measurement point of consumer by type of consumer and heat holder; installed and realized power of units for gas turbines, boilers and blocks	Annual; previous year	Reporting method – questionnaire EN -4.6	Enterprises with main activity being generation of heat and units of enterprises with principal activity other than generation of heat if those units generate heat as activity complementary to principal activity of centerprise; 16/3	Official Statistics Law	Republic of Serbia	6/10

Ред-ни број	Одговорни произвођач званичне статистике	Назив истраживања и друге активности и ознака упитника	Кратак садржај истраживања и друге активности	Периоди спровођења и референтни период или датум	Методи и извори прикупљања података	Извештајне јединице и рок за давање података	Обавезност давања података	Територијални ниво објављивања података ¹	Рок за прве резултате
1	2	3	4	5	6	7	8	9	10
6.	Statistical Office of the Republic of Serbia	Energy balance of heat generation and consumption – questionnaire for enterprises dealing with heat distribution (EN-4.7)	Purchased energy by heat holders, transport losses and heat delivered to measurement point of consumers and heat holders; heat energy delivered to measurement point of consumers by type of consumer and heat holders	Annual; previous year	Reporting method – questionnaire EN -4.7	Enterprises dealing with heat distribution; 16/3	Official Statistics Law	Republic of Serbia	6/10
7.	Statistical Office of the Republic of Serbia	Energy balance of mining and consumption of coal – questionnaire for enterprises dealing with coal mining and and coal products manufacture (EN-4.8)	Mining of coal, dried lignite and coal briquettes; stocks at beginning and end of year, purchase from others in the country, imports, exports, consumption for manufacture of briquettes and dried lignite and own consumption, losses; sale of coal, briquettes and dried lignite in the country; commercial sale and sale to end users by type of consumer.	Annual; previous year	Reporting method – questionnaire EN -4.8	Enterprises engaged in mining of hard and brown coal and lignite, and peat; 16/3	Official Statistics Law	Republic of Serbia	6/10
8.	Statistical Office of the Republic of Serbia	Energy balance of mining and consumption of coal – questionnaire for enterprises dealing with production of gas from blast furnaces (EN-4.8.1)	Production of blast furnace gas used by companies' sections; blast furnace gas consumed for production of technical steam, blast furnace gas consumed for production of heat in ironworks intended for heating, blast furnace gas consumed for electricity generation in ironworks, losses and deliveries to others and calorific value; quantity of consumed coke in blast furnace and calorific value	Annual; previous year	Reporting method – questionnaire EN -4.8.1	Enterprises engaged in blast furnace gas production; 16/3	Official Statistics Law	Republic of Serbia	6/10
9.	Statistical Office of the Republic of Serbia	Energy balance of coal mining and consumption – questionnaire for enterprises dealing with production of converter gas (EN-4.8.2)	Production of converter gas , converter gases consumed in process of iron mining and manufacture of iron products, for production of heat in ironworks, for electricity generation in ironworks, exhausted, dispatched to others and calorific value	Annual; previous year	Reporting method – questionnaire EN -4.8.2	Enterprises engaged in blast furnace gas production; 16/3	Official Statistics Law	Republic of Serbia	6/10

Ред-ни број	Одговорни произвођач званичне статистике	Назив истраживања и друге активности и ознака упитника	Кратак садржај истраживања и друге активности	Периоди спровођења и референтни период или датум	Методи и извори прикупљања података	Извештајне јединице и рок за давање података	Обавезност давања података	Територијални ниво објављивања података/ ¹	Рок за прве резултате

1	2	3	4	5	6	7	8	9	10

registers; conditions of data and information dissemination; data confidentiality and individual data protection; cooperation with international statistical organisations, etc). The Law is harmonised with the main principles and provisions of international regulations concerning official statistics.

The National Bank of Serbia is the responsible institution for the collection, processing and analysis of data of monetary and balance of payment statistics in the Republic of Serbia which are processed in line with the Law on the National Bank of Serbia and the Law on Official Statistics. The Law on the National Bank of Serbia lays down that it can prescribe obligations to banks, financial organisations and other legal entities to record, collect, process and submit certain data. The Law on Official Statistics regulates that the National Bank of Serbia sets up the standards for official statistics within relevant functions.

In the forthcoming period, it is necessary to amend the Law for more efficient organisation of official statistics system, as well as to become harmonised with the provisions of other laws concerning the protection of individual data.

2. Quality management

Ред-ни број	Одговорни произвођач званичне статистике	Назив истраживања и друге активности и ознака упитника	Кратак садржај истраживања и друге активности	Периоди спровођења и референтни период или датум	Методи и извори прикупљања података	Извештајне јединице и рок за давање података	Обавезност давања података	Територијални ниво објављивања података/ ¹	Рок за прве резултате
1	2	3	4	5	6	7	8	9	10
1.	Statistical Office of the Republic of Serbia	Quality management	<p>The initialised activities concerning the implementation of quality management system are to be continued. The system relies on the principles of the Total Quality Management (TQM), principles of the Code of Statistical Practice of official statistics of the UN. In that sense, the Statistical Office of the Republic of Serbia with:</p> <ul style="list-style-type: none"> - tend to improve the cooperation with data and services users by introducing new forms of communication and mutual information; - continue to monitor the opinions and satisfaction of users and to meet their requirements; - incite, within the Office and the entire official statistics system, initiatives and creativity in view of modernising and rationalising the system; - continue to monitor the satisfaction, opinions and points of view of the employees concerning their position in the system of official statistics, as well as in the system itself; - work on the indentification, definition and rationalisation of the process of producing statistical products and prepare the basis for the reorganisation of the whole system; - create prerequisites for the

1	2	3	4	5	6	7	8	9	10

implementation of internal revision and self-evaluation;

- carrying out permanent training of all employees in the Office and in the scope of the international cooperation, and
- developing intensive cooperation and exchanging experiences with neighbouring countries and ESS countries, and enhancing systematically the operations and process of the evaluation of the efficiency and effectiveness of the quality system.

By efficient conducting of these activities, the Statistical Office of the Republic of Serbia becomes an organisation dedicated to the quality and its improvement.

3. Classification

1) Classification of Activities

1. Statistical Office of the Republic of Serbia Classification of Activities
By the Law on Classification of Activities („Official Gazette of RS”, No. 104/09) a general standard has been established for the classification of classification units in activities. The Law has laid down the scope of application of the Classification of Activities; method of defining the names, codes and description of activities; units of classification; principal activity; procedure for the registration of classification units and the methodology for the classification

Ред-ни број	Одговорни произвођач званичне статистике	Назив истраживања и друге активности и ознака упитника	Кратак садржај истраживања и друге активности	Периоди спровођења и референтни период или датум	Методи и извори прикупљања података	Извештајне јединице и рок за давање података	Обавезност давања података	Територијални ниво објављивања података/ ¹	Рок за прве резултате
1	2	3	4	5	6	7	8	9	10

of activities. The Classification of Activities has been harmonized with the international classification (NACE Rev. 2). The Classification of Activities is completely harmonised with the international classification NACE rev.2. The classification has been implemented in statistical surveys, i.e. in the collection, analysis, publication and dissemination of official statistical data.

2) Classification of products by activities

1. Statistical Office of the Republic of Serbia National classification of products and services by activities
Introduction and implementation of the version of the Classification of Products and Services in line with the international classification CPA Ver. 2.1.

3) Nomenclature of industrial products (Prodcom List)

1. Statistical Office of the Republic of Serbia Nomenclature of industrial products for the Annual Survey of Industry (Prodcom List)
The nomenclature is used for the purpose of collecting annual data on the level of industrial products and services and each year they are harmonised with the Prodcom List.
2. Statistical Office of the Republic of Serbia Nomenclature of industrial products for the Monthly Survey of Industry
The nomenclature is used for the purpose of calculating monthly indices of industrial production according to the Classification of Activities.

4) Classification of types of buildings

1. Statistical Office of the Republic of Serbia Classification of types of buildings
The classification of the types of buildings applied is fully harmonised with the EU Classification of Buildings.

Ред-ни број	Одговорни произвођач званичне статистике	Назив истраживања и друге активности и ознака упитника	Кратак садржај истраживања и друге активности	Периоди спровођења и референтни период или датум	Методи и извори прикупљања података	Извештајне јединице и рок за давање података	Обавезност давања података	Територијални ниво објављивања података ¹	Рок за прве резултате
1	2	3	4	5	6	7	8	9	10

5) Classification of statistical international trade of goods

1. Statistical Office of the Republic of Serbia and Ministry of Finance – Customs Administration

Combined nomenclature – Customs Tarriff (CT)

The Customs Tarriff is harmonised with the EU Combined Nomenclature. The harmonisation of the Customs Tarriff with the Combined Nomenclature is in the course of process; correspondences are made between the current CT and the one being valid in the previous year and repeating the processing for previous year according to CT; implementation of CT for the current year and its linking with other classifications existing in the statistical system.
2. Statistical Office of the Republic of Serbia

Standard international trade classification (SITC)

SITC rev 4 has been applied since 1/1/2010 based on the recommendations of the UN statistical bureau.
3. Statistical Office of the Republic of Serbia and Ministry of Finance – Customs Administration

Harmonised system of names and codes (HS)

The Harmonized System of name and codes has been in use and harmonized with the harmonized system of names and codes HS 2012.
4. Statistical Office of the Republic of Serbia

Classification by broad economic categories (BEC)

The classification BEC rev. 4 is in use, harmonized with the UN classification for broad economic classes for the purpose of harmonization in the system of national accounts.
5. Statistical Office of the Republic of (GEONOM)

up the National Framework of Classifications. (NFC).

10) Classification of institutional sectors

1. Statistical Office of the Republic of Serbia Classification of institutional sectors
The classification of institutional sectors is part of the system of national accounts. Units are classified according to function principle and grouped in five institutional sectors of the national economy. Full implementation is expected in the forthcoming period.

11) Classification of government functions

1. Statistical Office of the Republic of Serbia Classification of Functions of Government (COFOG)
It is classification of expenditure of the government sector by its functions. Full implementation of the classification is expected in the forthcoming period, in the co-operation with the Ministry of Finance and Economy.

12) Nomenclature of statistical territorial units

1. Statistical Office of the Republic of Serbia Management of the nomenclature of Statistical Territorial Units (NSTJ)
Management of the database of alphanumerical data for statistical functional territorial wholes (three hierarchical levels: NSTJ 1, NSTJ 2 and NSTJ 3) defined according to the EU criteria (NUTS classification). Codes have been defined for statistical functional territorial units at all levels.

13) International classification of scientific fields

			relevant services can access them.						
3.	All responsible official statistics producers	Technology of information and electronic collaboration systems	Plans to enhance IT infrastructure of the Statistical Office of the Republic of Serbia under IPA Project, as well as the purchase of hardware, IT solutions consolidation and their implementation in the IT infrastructure.						
4.	All responsible official statistics producers	System for data exchange	Plans to set up standards for data exchange, both internally and via other organisations, in line with recommended standards of the International initiative for the development and use of efficient modalities for statistical data and metadata exchange (SDMX initiative). Therefore, it is necessary to define technical specifications and solutions and secure a uniform communication modality, both between applications within SORS and communication with information systems of other government bodies. Plans to further standardise working processes and transactions with constant improvement of client-oriented services, as well as the development of a web-service for providing customised services to enterprises.						
5.	All responsible official statistics producers	Systems for data collection and transmission of main data	Plans to make up a system for electronic collection and reporting. Plans to larger use of data from administrative sources, both with traditional and modern methods (Big Data etc.).						

Ред-ни број	Одговорни произвођач званичне статистике	Назив истраживања и друге активности и ознака упитника	Кратак садржај истраживања и друге активности	Периоди спровођења и референтни период или датум	Методи и извори прикупљања података	Извештајне јединице и рок за давање података	Обавезност давања података	Територијални ниво објављивања података/ ¹	Рок за прве резултате
1	2	3	4	5	6	7	8	9	10

7. Sampling method

1. Statistical Office of the Republic of Serbia Allocation and selection of sample
Definition of the standards and improvement of the methods that provide optimal sample allocation
Coordination of random samples of economic surveys.
2. Statistical Office of the Republic of Serbia Evaluation of parameters and sampling errors
Evaluation of parameters and errors for key survey parameters and surveys.
Evaluation of indices and their variances in the case of coordinated samples.
3. Statistical Office of the Republic of Serbia Development activities from sampling methodology
Enhancement of the use of statistical sampling methodology in surveys, via the monitoring of international experiences and enhancement of software support.

8. Analysis of time series

1. Statistical Office of the Republic of Serbia Analysis of time series
Statistical analysis and seasonally adjustment of time series with the use of mathematical statistical structural models and with the standardization of the procedures for the application of models in line with international standards.

9. Information and dissemination

1. All responsible official statistics producers Information and dissemination
Development of dissemination policy oriented towards the satisfaction in due time of high quality data users, i.e. those data should be adapted to their needs and requirements. In the forthcoming period, by making the data more

Ред-ни број	Одговорни произвођач званичне статистике	Назив истраживања и друге активности и ознака упитника	Кратак садржај истраживања и друге активности	Периоди спровођења и референтни период или датум	Методи и извори прикупљања података	Извештајне јединице и рок за давање података	Обавезност давања података	Територијални ниво објављивања података/ ¹	Рок за прве резултате
1	2	3	4	5	6	7	8	9	10

accessible and of better quality the official statistics will be recognized as the main source of reliable and timely data. Also, it is necessary to: improve the communication between the users and official statistics in order to satisfy users' needs; application of technology (Open Data, etc.) in the process of the dissemination of statistical data; improve the infrastructure to access the data in full confidentiality; increase the offer of publically available data for various users; build the cooperation with data users for better identification of their needs; increase the offer of microdata for the needs of R&D institutions according to the Procedure for enabling the access to individual data without the identifiers for R&D purposes and according to the conditions defined by ESS. Raise the awareness of the users about the possibilities and limitations of the official statistics.

10. International statistical cooperation

1. All responsible official statistics producers International statistical cooperation

Provision of available data to the most important international organisations (Eurostat, International Reconciliation Bank, European Central Bank, UN, IMF, World bank, etc.) and participation in the work of international working groups and assemblies, especially at meetings of working groups in

Eurostat. Use of IPA and other international funds.

Planned activities should lead to the harmonization with ESS, i.e. work on harmonizing the standards, classifications and methodologies for obtaining internationally comparable indicators, as well as involvement in international statistical cooperation of all responsible producers of official statistics.

11. Security of data and statistical confidentiality

1. Statistical Office of the Republic of Serbia

The official statistics fully protects the rights of data providers and statistical units. The principle of confidentiality includes data protection concerning individual statistical units provided that individual data can be used only for statistical purposes. The Law on Official Statistics stipulates that responsible statistics producers are bound to remove the identifiers of reporting and statistical units after having finished the processing of collected data. The questionnaires and other documents that contain individual data obtained in statistical surveys should be destroyed after the end of data entry, coding and processing in line with valide regulations. The data that are collected, processed and stored for statistical purposes are deemed confidential when a physical or legal person can directly or indirectly

Ред-ни број	Одговорни произвођач званичне статистике	Назив истраживања и друге активности и ознака упитника	Кратак садржај истраживања и друге активности	Периоди спровођења и референтни период или датум	Методи и извори прикупљања података	Извештајне јединице и рок за давање података	Обавезност давања података	Територијални ниво објављивања података/ ¹	Рок за прве резултате
1	2	3	4	5	6	7	8	9	10

identify by name, address or identifier. Confidential data cannot be used to determine the rights and creation of obligations to a reporting unit. Responsible producers of statistical data can provide to R&D institutions, on written request, individual data without the identifier, but they are bound to keep records on such users, as well as on the purposes for which the data are submitted. The protection of confidential data is secured by limiting the access to confidential data because it is restricted to persons who produce official statistical data in performing their duty to the extent to which those data are necessary for the production of official statistics. Responsible producers of official statistics are bound to take all prescribed administrative, technical and organizational actions for the protection of confidential data against illegal access, disclosure or use.

LEGAL PREAMBLE

I. LEGAL BASIS

Legal basis to adopt this regulation is laid down in Article 18, paragraph 2 of the Law on Official Statistics (“Official Gazette of the RS”, No. 104/09), which stipulates that the Government shall adopt the annual applicable plan and in the disposition of Article 42, paragraph 1 of the Law on Government („Official Gazette of the RS”, No. 55/05, 71/05 – corrigendum, 101/07, 65/08, 16/11, 68/12 – US, 72/12, 7/14 – US and 44/14), which stipulates that the Government shall further detail the relation regulated by the law, according to the purpose and goal of the law.

II. REASONS TO ADOPT THE ACT

Drafting programmes and plans of official statistics is one of the most important segment in the process of intensive activities of the Republic of Serbia as to the harmonization with standards and practice of the European Union.

The Law on Official Statistics states that official statistics activities, i.e. the carrying out of statistical surveys and production of statistical indicators by responsible producers of official statistics shall be based on a five-year programme adopted by the National Assembly and on annual applicable plans adopted by the Government.

The National Assembly adopted in 2015 the Decision on the Programme of Official Statistics from 2016 to 2020 (“Official Gazette of the RS”, No. 55/15). Also, based on the Decision and in line with the Law on Official Statistics, the Government is bound to adopt relevant regulations that define annual plans of official statistics.

The adoption of the programme and plan of official statistics secure data for the monitoring and measurement of the results of activities, particularly in the economic sphere, and the capacity to take upon EU membership obligations (part relative to statistics) as well as the monitoring of indicators of meeting the economic criteria. Also, the obligations of the official statistics of the Republic of Serbia and definition of concrete activities do not stem only from the process of accession to EU but also from the relationship with other international institutions, such as the United Nations, International Monetary Fund, World bank, OECD, etc.

Generally, the plan has been prepared following the concept of EU official statistics, i.e. Eurostat. The initial basis to define the content of this plan is: Decision on the Programme of Official Statistics from 2016 to 2020 in which the Strategy for the Development of the Official Statistics of the Republic of Serbia , National Programme of Integration and Programme of Eurostat (Compendium) are defined.

Statistical Office of the Republic of Serbia , which is the part of official statistics of the Republic of Serbia, which carries out most of statistical activities, has coordinated activities relative to drafting the plan of official statistics for 2016, i.e. contacted responsible producers of official statistics. Namely the propositions of planned activities have been defined by institutions that have been designated in the Decision on the Programme of Official Statistics from 2016 to 2020 as responsible producers of official statistics for related subject-matters. In that sense, the programme encompasses, besides the activities of the Statistical Office of the Republic of Serbia, the activities of: National Bank of Serbia, Ministry of Finance, Ministry of Agriculture and Environmental Protection, Ministry of Education, Science and Technological Development, Ministry of Labour Employment and Social Policy, Ministry of Health, Ministry of Youth and Sports, Pension and Disability Insurance Fund of the Republic of Serbia, National Employment Service, Health Insurance Fund of the Republic of Serbia, Town Administration of the city of Belgrade – for the territory of the city of Belgrade.

III. EXPLANATION OF SELECTED SOLUTIONS

The provisions of the Law on official statistics specify that the plan shall contain details of the Programme of Official Statistics from 2016 to 2020; the list of statistical surveys that shall be conducted with mention whether those are compulsory or not; the list of administrative sources, as well as the data obtained by the method of permanent monitoring that are used in official statistics and development statistics mentioned in the five-year programme.

The plan of official statistics for 2016 develops further five-year programme with mention of statistical surveys and other activities according to the structure of statistical fields and subjects cited in the Review of expected Results of Official Statistics and Review of the Major Infrastructure and Development Activities that can be classified into selected areas. The above mentioned reviews are part of the Decision on the Programme of Official Statistics from 2016 to 2020.

Statistical survey, other activity or administrative source in the scope of the given statistical field are defined by: ordinal number, mention of the responsible producer of the official statistics, name of the survey and other activities and questionnaire code; short content of the survey and other activities; survey and reference periods of the date; method and source of data collection; mention of reporting units and deadlines to submit data; obligation to provide data; territorial level of data publishing and deadlines for preliminary results.

IV. FINANCIAL FUNDS FOR IMPLEMENTING THIS ACT

Funds for implementing this regulation, i.e. plan of official statistics, are budget-founded of the Republic of Serbia.

To carry out the Plan of Official Statistics for 2015 the funds are provided from the following sources, according to programme activities/projects and economic classification:

Programme activity/Project	Economic classification		Total funds
		Financing sources for item 34	945,846,000
	01	Budget income	750,257,000
	06	Donations from international organisations	180,850,000
	15	Funds from donations from previous years not spent	6,700,000
	56	EU financial help	8,039,000
Programme		Production of official statistics results	945,846,000
0001		Demographic and social statistics	7,459,000
	416	Bonuses to employees and other special expenditure	229,000
	422	Travel costs	1,200,000
	423	Contract services	1,000,000
	424	Specialised services	3,750,000
	426	Materials	1,280,000
0002		Macroeconomic statistics and agriculture statistics	23,455,000
	416	Bonuses to employees and other special expenditure	196,000
	422	Travel costs	550,000
	424	Specialised services	22,045,000

	426	Materials	664,000
0003		Business statistics	82,194,000
	416	Bonuses to employees and other special expenditure	328,000
	422	Travel costs	950,000
	424	Specialised services	79,814,000
	426	Materials	1,102,000
0004		Administration and management	616,555,000
	411	Wages and salaries and employees' compensations	418,178,000
	412	Social contributions borne by the employer	75,750,000
	413	Remunerations in kind	1,896,000
	414	Social benefits to employees	1,601,000
	415	Employees' costs	17,150,000
	416	Bonuses to employees and other special expenditures	3,022,000
	421	Recurring costs	45,800,000
	422	Travel costs	7,000,000
	423	Contract services	24,000,000
	425	Routine maintenance	7,550,000
	426	Materials	10,954,000
	441	Payment of domestic interest rates	151,000
	482	Taxes, compulsory taxes and fines and charges	500,000
	483	Fines and charges based on court decision	1,000
	512	Machines and equipment	3,001,000
	515	Non-material assets	1,000
4001		Harmonisation of official statistics with European Statistical System	216,183,000
	411	Wages and salaries and employees' compensations	8,000,000
	412	Social contributions borne by the employer	1,432,000
	421	Recurring costs	300,000
	422	Travel costs	15,500,000
	424	Specialised services	166,857,000
	426	Materials	2,500,000
	462	Donations of international organisations	20,594,000
	512	Machines and equipment	1,000,000

To implement the Plan of Official Statistics for 2016 and 2017 funds are planned according to budgetary limits defined by the Ministry of Finance. Funds planned under programme activities/projects are shown in the following table:

Name of the programme, programme activities/Project	Granted funds for	Planned funds for	Planned funds for
---	-------------------	-------------------	-------------------

	2015	2016	2017
1	3	4	6
Production of official statistics results	945,846,000	818,935,000	786,859,000
Demographic and social statistics	7,459,000	6,186,000	5,230,000
Macroeconomic statistical and agriculture statistics	23,455,000	22,681,000	21,585,000
Business statistics	82,194,000	73,552,000	69,570,000
Administration and management	616,555,000	599,149,000	573,107,000
Harmonisation of official statistics with European Statistical System	216,183,000	117,367,000	117,367,000

Minor budgetary expenditure and outlays for the implementation of the Plan of Official Statistics in the next two years are the result of a minor number of planned statistical activities as well as of a minor volume of donations from international organisations and budgetary restrictions.
