1. Metadata

1	All responsible official statistics producers	Metadata system 025242	The system of statistical metadata covers development and linking of: structural metadata (concept, surveys, records, data sources, tools of data collection, classifications and code lists, data collection method, units and variables), reference metadata (metadata describing the content and quality of statistical data – conceptual, methodological quality metadata), and operational metadata (representing physical implementation of certain concepts and the way of processing (creation / transformation) of data in the process of statistics production	Continuous				Statistical surveys of the Statistical Office of the Republic of Serbia	Law on Official Statistics		
2	All responsible official statistics producers	System of reference metadata 025243	It is planned to develop and implement a system of reference metadata and quality report (RZSMETA). Reference metadata describe the content and quality of statistical data and are aimed at providing the users of statistical products with additional information for their correct use and interpretation. The system of reference metadata and quality report RZSMETA is made of a repository of metadata (SQLSERVER database) and an application enabling users to create reference metadata and quality reports. It is developed according to Eurostat standards (SIMS 2.0). Reference metadata are accessible to users on the website of the Statistical Office of the Republic of Serbia, and quality reports are published on the Intranet portal of the Statistical Office	Continuous					Law on Official Statistics
